

SecureCode Auditor - Security Assessment

Project: Personal Project

Language: java

Scan ID: 6ac20bc05b3659d746f2505c

Date: 4/10/2026, 1:48:08 pm

Type: INITIAL

Security Summary

Total Findings: 8

Critical: 2 | High: 4 | Medium: 2 | Low: 0

Detailed Findings

java-hardcoded-secret **MEDIUM**

Status: OPEN

File: Vulnerable.java:9

Rule: undefined | **CWE:** N/A | **OWASP:** N/A

Description

Hardcoded secret detected. This can lead to sensitive information exposure.

AI analysis not generated for this finding.

java-sql-injection **HIGH**

Status: OPEN

File: Vulnerable.java:24

Rule: undefined | **CWE:** N/A | **OWASP:** N/A

Description

Potential SQL injection detected.

AI analysis not generated for this finding.

java-command-injection **HIGH**

Status: OPEN

File: Vulnerable.java:33

Rule: undefined | **CWE:** N/A | **OWASP:** N/A

Description

Using Runtime.exec() is dangerous if input is not sanitized.

AI analysis not generated for this finding.

java-weak-cryptography **MEDIUM**

Status: OPEN

File: Vulnerable.java:37

Rule: undefined | **CWE:** N/A | **OWASP:** N/A

Description

MD5 is a weak cryptographic algorithm.

AI analysis not generated for this finding.

java-unsafe-deserialization **HIGH**

Status: OPEN

File: Vulnerable.java:47

Rule: undefined | **CWE:** N/A | **OWASP:** N/A

Description

Unsafe deserialization of objects can lead to remote code execution.

AI analysis not generated for this finding.

SQL String Concatenation **CRITICAL**

Status: OPEN

File: Vulnerable.java:25

Rule: SCA-SQL-001 | **CWE:** CWE-89 | **OWASP:** A03 Injection

Description

Detect SQL queries constructed using untrusted input.

Vulnerable Code

```
"SELECT * FROM users WHERE username = '" +
```

AI analysis not generated for this finding.

Missing Parameterized Queries **CRITICAL**

Status: OPEN

File: Vulnerable.java:28

Rule: SCA-SQL-004 | **CWE:** CWE-89 | **OWASP:** A03 Injection

Description

Detect database queries that don't use prepared statements or parameterized APIs.

Vulnerable Code

```
statement.executeQuery(query);
```

AI analysis not generated for this finding.

Weak Encryption HIGH

Status: CONFIRMED

File: Vulnerable.java:41

Rule: SCA-CRYPTO-005 | **CWE:** CWE-327 | **OWASP:** A02 Cryptographic Failures

Description

Detect DES, 3DES, RC4, ECB and other inappropriate cryptographic configurations.

Vulnerable Code

```
// 5. Unsafe deserialization
```

AI analysis not generated for this finding.

Manual Security Review

Decision: TRUE_POSITIVE

Reviewer Risk: High

Comments: need to fix at high priority
